

## Specimen Submission Guidelines – Required Documents

If documentation requirements are not otherwise outlined in the protocol or through a linked resource (usually in Section 15 in SWOG-led protocols), then submit documents as indicated below, in accordance with the standard requirements.

| Specimen Type                                                                                                             | Required Documents                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

### Pathology (or Other Required) Report Redaction and Labeling Requirements

Unless otherwise outlined in the protocol (usually in Section 15 in SWOG-led protocols):

- Reports must be in English or include a translation of all information listed below.
- Pathology reports MUST include:**
  - Date of procedure,
  - Surgical pathology ID (SPID) or accession number,
  - Block number(s) with description of each block,
  - Anatomic site,
  - Diagnosis, and
  - Gross description.
- It is acceptable to print a .PDF from the EMR so that the entire *redacted* report is included with the specimens.
- Remove participant identifiers such as name, date of birth, medical record number, and insurance information from the pathology or other required report.**
  - Pathology reports:
    - Do not redact** the date of procedure (collection date), surgical pathology identification (SPID) number, block number, or diagnosis.
    - Do not cut and paste from the electronic medical record (EMR).
    - If any of the required data (in #2 above) is missing, then processing may be delayed until an updated report is submitted.
  - Other required reports: Do not redact the date of procedure (collection date) or diagnosis.
- Label each page of the pathology or other required report with the SWOG Participant ID#.**
- The information contained in the partially redacted pathology or other required report must match the information printed on each specimen label affixed to the specimen(s) included in the package.**
- If the protocol requires indication of tissue type, refer to [Pathology Reports](#) for tissue type definitions.**
