## **Specimen Labeling Requirements**

If labeling requirements are not otherwise specified in the protocol or through a linked resource (usually in Section 15 in SWOG-led protocols), then specimens must be labeled in accordance with the standard requirements below.

Minimum Labeling Requirements		Additional Labeling Requirements for FFPE Tissue		Other Labeling Requirements
<ul> <li>SWOG Participant ID</li> <li>Participant Initials (L,FM)</li> <li>Date of specimen collection (MM/DD/YYYY)</li> <li>Specimen Type (whole blood, serum, bone marrow, urine, stool, etc.)</li> </ul>		From the corresponding pathology report:  • Surgical Pathology ID (SPID, Accession #)  • Block number (e.g., A2, 3E, 2-1, B, etc.)		Bone Marrow:  • Laterality – right (R), or left (L)  Protocol-specific requirements:  • Collection time (e.g., PK specimens)  • Tissue type – primary (P), metastatic (M), or normal (N)  • Tissue slide thickness, in µm (microns)
Label	Example La	bel	Specimen ty	rpe(s)
Basic labels or MS Word Version for Download	Patient #: Patient Initials (L,FM): Collection Date: Specimen Type:		<ul> <li>Blood/blood products (e.g., plasma, serum, buffy coat)</li> <li>Bone Marrow Aspirate and Bone Marrow Biopsy</li> <li>Urine</li> <li>Stool</li> <li>Other biofluids</li> </ul>	
Time-based labels or MS Word Version for Download	Patient #: XSWOG Patient Initials (L,FM): Collection Date: Collection Time: Specimen Type:		Specimens collected for studies where multiple samples are collected during the same day and the lab requires collection time to differentiate them for processing	
Tissue Label or MS Word Version for Download	Patient #: Patient Initials (L,F Collection Date: Surg Path: Block #:	×SWOG ≥	<ul><li>FFPE tissu</li><li>Frozen tiss</li></ul>	e (blocks, slides, scrolls/curls) ue
Tissue Label with Tissue Type or MS Word Version for Download	Patient #: XSWOG Patient Initials (L,FM): Collection Date: Surg Path: Block #: Tissue Type:		<ul><li>FFPE tissue (blocks, slides, scrolls/curls)</li><li>Frozen tissue</li></ul>	
Tissue w microns label or MS Word Version for Download	Patient #: XSWOG Patient Initials (L,FM): Collection Date: Surg Path: Microns: Block #:			e slides or scrolls
Tissue w microns & Tissue Type label or MS Word Version for Download	Patient #: Patient Initials (L,F Collection Date: Surg Path: Block #:	SWOG  Microns: Tissue Type:		e slides or scrolls
Basic with Laterality or MS Word Version for Download	Patient #: Patient Initials (L, Collection Date: Specimen Type: Laterality (R or L)		When the pro Bone Marro Bone marro	·

## **Additional Guidelines for Specimen Labeling**

- For vials and tubes:
  - Place a label on each vial submitted.
  - Do not cover expiration date of collection tubes. Trim labels as needed to fit.
- For FFPE tissue blocks:
  - Place the specimen in a small bag and apply the label on the outside of the bag. Do not place the label directly on the tissue block.
  - o The block must be labeled with the Surgical Pathology ID# (Accession#) and SWOG Participant ID.
- For FFPE tissue slides:
  - Place labels directly on the slide container or on each individual slide.
  - o If placing labels on the slide container, then the SWOG Participant ID, surgical pathology ID (accession #) and block number must be included on each individual slide.
- For frozen specimens, cold storage can make the labels come off easily. Consider these tips:
  - For best results: Label specimens <u>prior to freezing</u>. Use laboratory marking pens or a cryogenic marker to label frozen biofluids and use labels that are designed to adhere to frozen surfaces.
    - Cryogenic labels designed to print on standard inkjet printers and adhere to frozen cryovials can be purchased at: <u>Labtag.com</u>. Please note that the labels are smaller than the standard label templates accessible from SWOG.org (via above links).
  - Wrap the label tightly all the way around the tube so the overlap is on top of the label (without covering the labeling data). Wrap the label with a bit of a tail so that the label can stick to itself instead of the tube.
  - O Handwrite required information on the tubes in case the label comes off.
