

# Geriatric Assessment Workshop

## Hands-On Geriatric Assessment: Practical Tools for Age-Inclusive Cancer Research

**FRIDAY, SEPT 19 • 10 – 11:30 AM CT • CRYSTAL A (LOBBY LEVEL)**

This interactive workshop will introduce you to the principles and application of the geriatric assessment (GA) and demonstrate how it can be included in the workflow of cancer clinical trials.

Using a case-based format, you will gain hands-on experience with validated tools to assess key geriatric domains relevant to oncology research, including

**functional  
status**

**nutrition**

**social support**

**cognition**

**chemotherapy  
toxicity risk**

By the end of the session, you will understand which tools are most appropriate for use in clinical trials and how geriatric assessment can help ensure that studies are more inclusive of older adults.

The workshop is open to anyone interested in improving the representation of older adults in cancer research. We welcome participation from physicians, nurses, advanced practice providers (APPs), physician assistants (PAs), and research team members across all disease sites.

Whether you are new to geriatric oncology or looking to strengthen your approach to age-inclusive trial design, this session will provide practical tools and hands-on experience to support your work.

### WORKSHOP FACULTY

**Sukeshi Patel**  
Arora, MD

**Efrat Dotan,**  
MD

**Kristen Haase,**  
PhD

**Elizabeth**  
Kessler, MD

**Jyotsana**  
Parajuli,  
PhD, MGS, RN

**Mina S. Sedrak,**  
MD, MS

**Enrique Soto**  
Pérez de Celis,  
MD, PhD –  
Organizer
