

# SWOG Clinical Trials Partnerships (CTP)

HOW SWOG PARTNERS WITH INDUSTRY TO CONDUCT CANCER CLINICAL TRIALS

## SWOG CTP Update Forum

THURSDAY, MAY 1 • 5:30 PM – 6:30 PM PT • GRAND BALLROOM A (STREET LEVEL) / HYBRID

### How do we work together in SWOG CTP?

- SWOG CTP overview
  - Joint study development process
  - Scientific areas of interest
  - Types of trials
- Accrual completed: TROPION-Breast03 FDA registration trial
- SWOG CTP trials in protocol development:
  - **21CTP.HN01**: Phase II study in recurrent metastatic head and neck cancer with cohorts defined by type of and/or response to prior systemic therapies
  - **21CTP.BREAST01 (MONITOR)**: Phase II platform trial using circulating tumor DNA to monitor treatment response in HR+, HER2- metastatic breast cancer

- SWOG CTP active trial
  - **21CTP.LEUK01**: Phase II trial for patients with newly diagnosed Philadelphia chromosome-positive (Ph+) acute lymphoblastic leukemia
    - **21CTP.LEUK01 will activate May 15th** – *To apply to open the study, complete the feasibility questionnaire by May 16th – linked from:*

[swogctp.org/trials/21CTPLEUK01](https://swogctp.org/trials/21CTPLEUK01)

- Site logistics: operations & data management
  - Feasibility survey outreach and site selection
  - Site funding and contracts
- Other projects in the works
- Novel CTP collaborative opportunities

**All are invited!**
