

S2424CD Information Session

2424CD: A Randomized Controlled Trial of an Intervention called “Algorithm-Enabled Patients Activated in Cancer Care Through Teams” (A-PACT) to Improve Goals of Care Communication for People with Cancer

THURSDAY, MAY 1 • 1:30 – 2:30 PM PT • PACIFIC HI (PACIFIC CONCOURSE LEVEL) / HYBRID

All NCORP-based staff and investigators are invited!

We invite members from NCORP sites to learn about this new cancer care delivery trial focused on improving goals of care communication between patients with cancer and their clinical care team.

S2424CD features an automated screening tool to reduce the workload for each site and make trial enrollment much easier. The protocol will activate in Fall 2025 and **we are recruiting sites to set up the screening tool** in preparation for launch.

THIS SESSION WILL DISCUSS:

Trial objectives and design

The intervention and goals of care

Benefit of lay health navigators & education for practices and patients

Use of EHR-integrated participant screening processes to reduce staff effort

Financial support for the trial and IT setup

Logistics for site participation
